Election/Restrictions

Claims 1-52 are allowable. Claims 3 and 4, previously withdrawn from consideration as a result of a restriction requirement, contain all the limitations of an allowable claim. Pursuant to the procedures set forth in MPEP § 821.04(a), **the restriction requirement for the inventions, as set forth in the Office action mailed on 9/30/05, is hereby withdrawn** and claims 3 and 4 are hereby rejoined and fully examined for patentability under 37 CFR 1.104. In view of the withdrawal of the restriction requirement, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

Claims 1-52 are allowed.

The following is an examiner's statement of reasons for allowance: The Prior Art of record fails to teach or render obvious a method of manufacturing a light-propagating probe for a near-field microscope, the light-propagating probe having a light-propagating body that terminates at one end in a hook-shaped section that has a sharpened tip section at a free end thereof, the tip section being coated with a metal film coating except at the tip end thereof to form a transparent opening at the tip end for passing light, a portion of the light-propagating body that extends rearward of the hook-shaped section constituting a spring operating part for functioning as a cantilever capable of being displaced in a direction perpendicular to a sample surface, and the light-propagating body having a reflecting surface for carrying out optical position detection of the tip section, the method comprising:

a step of sharpening the light-propagating body; a step of forming the light-propagating body in a hook-shape; a step of forming the reflecting surface; a metal film coating step for forming the transparent opening; a step of protecting the transparent opening with a resist material; a metal film coating step for

coating at least the reflecting surface; and a step of removing the resist material. Note that Pages 31-33 of *Arguments* section, filed 3/20/07, recite the reasons, which form the basis for the withdrawal of the previous rejection.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
